The very popular Two-man Post Hole Digger is the work-horse of the Groundhog line. It's simple straight forward design promotes durability and requires very little maintenance.

This unit will dig with augers up to 12" and comes equipped with a centrifugal clutch and a finger operated, return-style throttle.

There are Safety Stop Switches located at both operator positions, which need to be depressed for the machine to run. The Post Hole Diggers proven gear box, which incorporates Timken® tapered roller bearings for years of trouble-free service. The gear box uses Groundhog's 7/8" square drive output shaft, an industry standard.

### Features
